Hello everyone!

I've just developed a dating site for everyone in the world and I'd like to share it with you guys :)

Application's name is TingleDingle and for now it's just a Tinder alike website but I'm currently working on some features I could beat Tinder - like site.

There will be:

- ghost ratio(every user will have ratio messages sent OR user's replied : messages received OR matches number
- relationship preferences(right after a match there will be a quick survey "What are you looking for?" and the answer will be only visible for your match)
- sending images directly from chat.

I would be grateful if you test my site out and gave me feedback.

The site is tingledingle.com

Thanks and cheers! :)
